Session 1: Personal Error Analysis & Self-Introduction

Name:
SK Varsha (2620030008)

Part A: Self-Introduction, Before and After

Before (first draft; flagged items in red)

Hello everyone, my name is SK Varsha and I am **very much excited** to be joining this team. I am a **student in KLH Bachupally** and I am **studing** engineering. **Me and my friends have did** a few small projects in Java, **which was our first time to code** in a team. I am **a person who work** hard and I always finish tasks on time, but sometimes I am **talking too less** in meetings. In the future I am wanting to improve my communication skills and learn from **each and every one of you**. Thank you for giving me this **opportunity,** I **look forward to work** with you all.

After (corrected for clarity, register and concision)

Hello everyone, I'm SK Varsha, a student at KLH Bachupally, and I'm excited to join this team. My friends and I built a few small Java projects, which was my first experience of coding in a team. I work hard and finish tasks on time, but I sometimes say too little in meetings, so I'm working on speaking up earlier. I hope to improve my communication and learn from all of you. Thank you for the opportunity; I look forward to working with you.

Part B: AI Accuracy Check, Flagged Items and Rules in My Own Words

Flagged text	Type	Rule (my own words)	Correction
very much excited	Intensifier	"Very much" suits verbs like "like" or "appreciate", not adjectives. With an adjective I use "very" or simply drop it.	excited
student in KLH Bachupally	Preposition	A place I belong to as a student takes "at", because I am at the institution, not inside it.	student at KLH Bachupally
studing	Spelling	When a verb ends in a consonant plus y, the y stays before -ing, so study becomes studying.	studying
Me and my friends have did	Pronoun case, verb form	When I am the doer I use "I", and I put myself last. After "have" I need a past participle, but for a finished event the simple past is enough.	My friends and I did
which was our first time to code	Verb pattern	"First time" is followed by an -ing form, and "which" needs a clear thing to point back to, so I rebuilt the clause.	which was my first experience of coding
a person who work	Subject-verb agreement	"Who" takes the number of the noun before it. "Person" is singular, so the verb needs -s.	a person who works
talking too less	Word choice	"Less" is for uncountable amounts. For an action I say I do it "too little", and the simple verb is enough.	say too little
each and every one of you	Redundancy	"Each" and "every" mean the same thing here, so saying both only adds length.	all of you
opportunity,	Comma splice	A comma alone cannot join two complete sentences. I need a full stop, a semicolon or a joining word.	opportunity;
look forward to work	"to" as a preposition	In "look forward to", the word "to" is a preposition, so a verb after it must end in -ing.	look forward to working

Part C: Personal Error Log

Recurring error	Rule	Example	How I will catch it
Subject-verb agreement	The verb must match its real subject, even after "who" or "which". I find the subject first, then choose the verb.	a person who work -> a person who works	Underline the subject and read it with the verb alone.
Verb forms after have	After have or has I need a past participle. If the event is finished and dated, the simple past is cleaner.	have did -> did	Check the word after every "have".
-ing after the preposition "to"	In phrases like look forward to, the "to" is a preposition, so the next verb ends in -ing.	look forward to work -> working	Test: "look forward to it" works, so use -ing.
Doubled or weak words	Two words that mean the same thing, or an extra "very much", make a sentence longer without adding meaning.	each and every one -> all	Delete one of the pair and reread.
Comma splices	Two complete sentences need a full stop, semicolon or conjunction, not just a comma.	opportunity, I look -> opportunity; I look	Ask: can both sides stand alone?

Part D: Reflection

1. The AI check caught the spelling slip and the agreement error at once, but I already knew both rules; I just miss them when typing fast.

2. It surprised me by flagging "each and every" and "too less", which showed me that wordiness is a habit I do not notice on my own.

3. Next time I will proofread once for agreement and once for extra words before running any tool.
